BKM INDUSTRIES LIMITED
(formerly known as Manaksia Industries Limited)
(CIN-L27100WB2011PLC161235)

Notes to the Separate Financial Statements

NOTE - 1: BACKGROUND

BKM Industries Limited (formerly Manaksia Industries Limited) (the company) is a public limited company incorporated and domiciled in India. The company has its primary listings on the BSE Limited and National Stock Exchange of India Limited, in India. The company is engaged in manufacture of Packaging Products, Marine Business and Steel Business.

NOTE - 2: SIGNIFICANT ACCOUNTING POLICIES

2.1 Basis of preparation

(i) Compliance with Ind AS :

The financial statements comply in all material aspects with Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 ("the Act") read with Companies (Indian Accounting Standards) Rules, as amended from time to time and other relevant provisions of the Act.

(ii) Historical cost convention :

The financial statements have been prepared under the historical cost convention, except for the following:

- a) Certain financial assets and liabilities that is measured at fair value;
- b) Net Defined Obligations;
- c) Non-current Assets held for sale.

(iii) Current And Non -Current Classification

All assets and liabilities have been classified as current and non-current as per the company's operating cycle and other criteria set out in the Schedule III to the Companies Act 2013. The company has ascertained its operating cycle as 12 months for the purpose of current and non-current classifications.

(iv) New and amended standards adopted by the Company

The Company has applied the following standards and amendments for the first time for their annual reporting period commencing 1 April 2018:

- a. Ind AS 115, Revenue from contracts with Customers
- b. amendment to Ind AS 20, Accounting for Government Grants and Disclosure of Government Assistance
- c. Appendix B, Foreign Currency Transactions and Advance Consideration to Ind AS 21, the Effects of Changes in Foreign Exchange Rates
- d. Amendment to Ind AS 12, Income Taxes
- e. Amendment to Ind AS 40, Investment Property
- f. Amendment to Ind AS 28, Investments in Associates & Joint Ventures and
- g. Amendment to Ind AS 112, Disclosure of Interests in other Entities

The Company had to change its accounting policies and make certain retrospective adjustments following the adoption of Ind AS 115. Most of the other amendments listed above did not have any impact on the amounts recognised in prior periods and are not expected to significantly affect the current and future periods.

2.2 Property, Plant and Equipment, Intangible Assets and Capital Work-in-progress

i) Recognition and Measurement

During the financial year 2018-19 the Freehold land carried as per revaluation model adopted during the financial year 2017-18, less accumulated depreciation and impairment. All other items of property, plant and equipment are stated at historical cost less accumulated depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognized as a separate assets, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the company and the cost of the item can be measured reliably. The carrying amount of any component accounted as separate assets is derecognized when replaced. All other repairs and maintenance are charged to profit and loss during the reporting period in which they are incurred.

The cost of Property, plant and equipment not available for use as on each reporting date are disclosed under capital work-in-progress.

ii) Depreciation methods, estimated useful lives and residual value

- a) Depreciation is calculated using the Straight Line Method (SLM) to allocate their cost, net of their residual values over their estimated useful lives. The useful lives have been determined based on the technical evaluation done by the independent experts which are in line with the Schedule II to the Companies Act, 2013.
- b) Any assets whose aggregate actual cost does not exceed five thousands rupees has been fully charged off in the year of addition.
- c) The residual values are not more than 5% of the original cost of the assets. The asset's residual values and useful lives are reviewed and adjusted at the end of each reporting period.
- d) Depreciation on assets purchased/acquired during the year is charged from the date of purchase of the assets. Assets that are acquired during the year are depreciated on pro rata-basis from the date of such addition or, as the case may be, up to the date on which such assets has been derecognized.

- e) An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.
- f) Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in profit or loss within other gains/(losses).
- g) Depreciation includes amortisation of lease-hold land over the period of lease.

iii) **Intangible assets :**

a) **Recognitions and Measurements :**

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any.

b) **Amortisation methods and periods**

Intangible Assets with finite useful lives are amortized on straight line basis over their estimated useful lives .

2.3 Revenue recognition :

Revenue is measured at the fair value of the consideration received or receivable. Amounts disclosed as revenue are exclusive of excise duty, net of returns, trade allowances, rebates, value added taxes, goods and service tax and amounts collected on behalf of third parties.

It recognises revenue when all the following conditions have been satisfied:

- (1) Has transferred to the buyer the significant risks and rewards of ownership of the goods;
- (2) the company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- (3) the amount of revenue can be measured reliably;
- (4) it is probable that the economic benefits associated with the transaction will flow to the entity and
- (5) the costs incurred or to be incurred in respect of the transaction can be measured reliably.

2.4 Other Incomes

- 1) Insurance claims has been recognized as revenue on cash basis.
- 2) Dividends shall be recognised as revenue when the shareholder's right to receive payment is established.
- 3) Interest shall be recognised as revenue using the effective interest method as set out in Ind AS 109.
- 4) Revenue other than above is recognised only when it is probable that the economic benefits associated with the transaction will flow to the entity. However, when an uncertainty arises about the collectability of an amount already included in revenue, the uncollectible amount or the amount in respect of which recovery has ceased to be probable is recognised as an expense, rather than as an adjustment of the amount of revenue originally recognised.

2.5 Inventories :

Raw materials, Stores and spares, Semi-finished goods, traded and finished goods

Inventories are valued as under –

- a) Raw materials, Stores spares, loose tools and Erection materials are valued at weighted average cost.
- b) Finished goods are stated at lower of Cost or Net Realisable Value.
- c) Saleable scraps, whose cost is not identifiable, are valued at estimated realisable value.

Cost of raw materials and stores comprises cost of purchase. Cost of inventories also include all other costs incurred in bringing the inventories to their present location and condition. Net realizable value is the estimated selling price in the ordinary course of business less the estimated cost of completion and the estimated costs necessary to make the sale.

Net realizable value is the estimated selling price in the ordinary course of business after deduction of the estimated cost of completion and the estimated costs necessary to make the sale.

2.6 Financial Instruments

Financial assets and liabilities are recognized when the company becomes a party to the contractual provisions of the instrument.

Financial Assets:

(i) Trade Receivables

Trade Receivables are recognized initially at fair value and subsequently measured at amortized costs less of provisions for impairment.

(ii) Other Financial Assets

a) Classifications

The company classifies its financial assets in the following categories:

- # Those to be measured subsequently at fair value (either through other comprehensive income or through profit and loss).
- # Those measured at amortised costs.

The classification depends upon the business model for managing the financial assets and contractual characteristics of the cash flows.

b) Measurements

Initial Recognition:

Financial assets are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets (other than financial assets at fair value through profit or loss) are added to or deducted from the fair value measured on initial recognition of financial assets. The transaction costs directly attributable to the acquisition of financial assets at fair value through profit or loss are immediately recognized in profit or loss.

Subsequent Measurement:

There are three subsequent measurement categories into which the company classifies its debt instruments financial assets:

i) measured at amortised cost

Financial assets are subsequently measured at amortized cost if these financial assets are held within a business whose objective is to hold these assets to collect contractual cash flows and the contractual terms of the financial assets give rise on specified dates to cash flow that are solely payments of principal and interest on the principal amount outstanding.

ii) measured at fair value through other comprehensive income

Financial assets are measured at fair value through other comprehensive income if these financial assets are held within a business whose objective is achieved by both collecting contractual cash flows on specified dates to cash flow that are solely payments of principal and interest on the principal amount outstanding and selling financial assets.

iii) measured at fair value through profit or loss

Financial assets are measured at fair value through profit or loss unless it is measured at amortised cost or fair value through other comprehensive income on initial recognition.

iv) Equity instruments :

An equity instrument is a contract that evidences residual interest in the assets of the company after deducting all of its liabilities. Equity instruments recognised at the proceeds received net off direct issue cost.

All equity instruments classified under financial assets are subsequently measured at fair value. The company has made an irrevocable election at the time of initial recognition to account for the equity instrument at fair value through other comprehensive income.

C) Impairment of Financial Assets :

The company assesses on forward looking basis the expected credit losses associated with its assets carried at amortized costs. The impairment methodology applied depends on whether there has been significant increase in credit risks. For trade receivables only, the company has applied the simplified approach permitted by Ind AS 109 Financial Instruments, which requires expected life time losses to be recognized from initial recognition of the receivables.

d) Derecognition of Financial Assets :

A financial asset is derecognized only when :

The company has transferred the rights to receive cash flows from the financial assets or retains the contractual rights to receive the cash flows of the financial assets but assumes a contractual obligation to pay the cash flows to one or more recipients.

Financial Liabilities

a) Borrowings :

- i. Borrowings are initially recognized at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortized cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognized in profit or loss over the period of the borrowings using the effective interest method.
- ii. Borrowings are removed from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss as other gains/(losses).
- iii. Borrowings are classified as current liabilities unless the entity has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period. Where there is a breach of a material provision of a long-term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand on the reporting date, the entity does not classify the liability as current, if the lender agreed, after the reporting period and before the approval of the financial statements for issue, not to demand payment as a consequence of the breach.

b) Trade and other payables :

These amounts represent liabilities for goods and services provided to the entity prior to the end of financial year which are unpaid. The amounts are unsecured and are usually paid within 45 days of recognition. Trade and other payables are presented as current liabilities unless payment is not due within 12 months after the reporting period. They are recognised initially at their fair value and subsequently measured at amortised cost using the effective interest method.

C) Other Financial Liabilities

Financial liabilities are measured at amortised cost using effective interest method. Financial liabilities carried at fair value through profit or loss are measured at fair value with all changes in fair value recognised in the statement of profit and loss.

Interest bearing loans and borrowings are subsequently measured at amortized cost using effective interest rate method. Gain and losses recognized in profit and loss when the liabilities are derecognized.

d) Offsetting of Financial Instruments:

A financial asset and a financial liability shall be offset and the net amount presented in the balance sheet when, and only when, an entity:

- (a) currently has a legally enforceable right to set off the recognised amounts; and
- (b) intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

2.7 Employee benefits :

(i) Short-term employee benefit obligations

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.

All Short term employee benefits such as salaries, incentives, special award, medical benefits which fall due within 12 months of the period in which the employee renders related services, which entitles him to avail such benefits and non accumulating compensated absences (like maternity leave and sick leave) are recognized on an undiscounted basis and charged to Profit and Loss Statement.

(ii) Post-employment obligations

The entity operates the following post-employment schemes:

- (a) defined benefit plans such as gratuity, Superannuation and
- (b) defined contribution plans such as provident fund.

Provident fund obligations

Contribution to the provident fund, which is a defined contribution plan, made to the Regional Provident Fund Commissioner is charged to the Profit and loss Statement on accrual basis.

Gratuity obligations

The liability or assets recognized in the balance sheet in respect of defined benefit gratuity plan is the present value of the defined benefit obligation at the end of the reporting period less that fair value of plan assets. The defined benefit obligation is calculated annually by actuaries using the projected unit credit method.

The present value of the defined benefit obligations denominated in INR is determined by discounting the estimated future cash flows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the term of related obligations.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expenses in statement of profit and loss.

Remeasurements gains and losses arising from experience adjustments and changes in actuarial assumptions are recognized in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the statement of changes in equity and in the balance sheet.

2.8 Foreign currency translation :

(i) Functional and presentation currency

Each items included in the financial statements are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements are presented in Indian rupee (INR), which is functional and presentation currency.

(ii) Transactions and balances

Foreign currency transactions i.e. Revenue, expense and cash-flow items denominated in foreign currencies are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognised in profit or loss.

Non monetary items that are measured that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. Translation differences on assets and liabilities carried at fair value are reported as part of fair value gain or loss.

2.9 Income tax :

- i. The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.
- ii. The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in the countries where the company and its subsidiaries and associates operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.
- iii. Current income tax expense comprises taxes on income from operations in India and is determined in accordance with the provisions of the Income Tax Act, 1961. Minimum Alternate Tax (MAT) is paid in accordance with the tax laws, which gives rise to future economic benefits in the form of tax credit against future income tax liability. The company offsets on a year on basis, the current tax assets and liabilities, where it intends to settle such assets and liabilities on a net basis. The current tax expense recognized in the financial statements is net off MAT credit utilized during the period.

- iv. Deferred income tax is provided in full, using the balance sheet approach, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, deferred tax liabilities are not recognized if they arise from the initial recognition of goodwill. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting profit nor taxable profit (tax loss). Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.
- v. Deferred tax assets are recognised for all deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.
- vi. Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.
- vii. Current and deferred tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

2.10 Cash and cash equivalents :

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of twelve months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts.

2.11 Borrowing costs :

- a) General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale.
- b) Other borrowing costs are expensed in the period in which they are incurred.

2.12 Provisions & Contingent Liabilities:

- a. A provision is recognized if, as a result of a past event, the Company has a present legal obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by the best estimate of the outflow of economic benefits required to settle the obligation at the reporting date. Where no reliable estimate can be made, a disclosure is made as contingent liability. Contingent assets are not recognized.
- b. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

2.13 Contributed equity :

a) Equity:

Equity shares are classified as equity.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

b) Dividends :

Provisions is made for any amount of dividend declared , being appropriately authorized and no longer at the discretion of the entity, on or before the end of reporting period but not distributed at the end of the reporting period.

2.14 Earning Per Share

a) Basic Earning Per Share

Basic Earning Per Share is calculated by dividing the profit attributable to owners of the company by the weighted average number of equity shares outstanding during the financial year.

b) Diluted Earning Per Share

Diluted Earning Per Share adjusts the figures used in the determination of the basic earning per share to take into account the after income tax effect of interests or other finance costs associated with the dilutive potential equity shares and the weighted average number of additional equity shares that would have been outstanding assuming the conversion of all dilutive potential equity shares.

2.15 Segment Reporting

Ind AS 108 "Operating Segments", establishes standards for the way that public business enterprises report information about operating segments and related disclosures about products and services, geographic areas, and major customers. The Company's operations predominantly relate to providing end-to-end business solutions to enable clients to enhance business performance. Based on the "management approach" as defined in Ind AS 108, the Chief Operating Decision Maker (CODM) evaluates the Company's performance and allocates resources based on an analysis of various performance indicators by business segments and geographic segments. Accordingly, information has been presented both along business segments and geographic segments. The accounting principles used in the preparation of the financial statements are consistently applied to record revenue and expenditure in individual segments, and are as set out in the significant accounting policies.

Business segments of the Company are primarily enterprises in packaging products and all other segments. All other segments represents the operating segments of businesses in India.

Revenue and identifiable operating expenses in relation to segments are categorized based on items that are individually identifiable to that segment. Revenue for "all other segments" represents revenue generated from customers located in India. Allocated expenses of segments include expenses incurred for rendering services. Certain expenses such as depreciation, which form a significant component of total expenses, are not specifically allocable to specific segments as the underlying assets are used interchangeably. Management believes that it is not practical to provide segment disclosures relating to those costs and expenses, and accordingly these expenses are separately disclosed as "unallocated" and adjusted against the total income of the Company.

Assets and liabilities used in the Company's business are not identified to any of the reportable segments, as these are used interchangeably between segments. Management believes that it is currently not practicable to provide segment disclosures relating to total assets and liabilities since a meaningful segregation of the available data is onerous.

Geographical information on revenue and business segment revenue information is collated based on individual customers invoiced or in relation to which the revenue is otherwise recognized.

2.16 Leases:

Leases under which the company assumes substantially all the risks and rewards of ownership are classified as finance leases. When acquired, such assets are capitalized at fair value or present value of the minimum lease payments at the inception of the lease, whichever is lower. Lease payments under operating leases are recognized as an expense on a straight line basis in net profit in the Statement of Profit and Loss over the lease term.

2.17 Investment Properties:

Investment properties held to earn rentals or for capital appreciation or both are stated in the balance sheet at cost, less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Any gain or loss on disposal of investment property is determined as the difference between net disposal proceeds and the carrying amount of the property and is recognized in the statement of profit and loss. Transfer to, or from, investment property are recognized at the carrying amount of the property.

2.18 Research and Development:

Unless dealt under respective Ind AS, research and development expenditure of revenue nature are charged to the Statement of Profit and Loss, while capital expenditure are added to the cost of fixed assets in the year in which these are incurred.

2.19 Government Grants:

Grants from government are recognized at their fair value where there is a reasonable assurance that the grants will be received and the company will comply all conditions.

Government grants relating to income are deferred and recognized in the statement of profit and loss over the period necessary to match them with the costs that they are intended to compensate and presented within other income.

Government grants relating to the purchase of property, plant and equipment are included in non-current liabilities as deferred income and are credited to statement of profit or loss on a straight line basis over the expected lives of the related assets and presented within other income.

2.20 Rounding of amounts :

All amounts disclosed in the financial statements and notes have been rounded off to the nearest Lakhs as per the requirement of Schedule III, unless otherwise stated.

BKM INDUSTRIES LIMITED
(formerly known as Manaksia Industries Limited)
(CIN-L27100WB2011PLC161235)

Notes to the Separate Financial Statements

NOTE - 3: RECENT ACCOUNTING PRONOUNCEMENTS

Accounting Pronouncement Issued but not effective :

a) Ind AS 116-Leases:

On March 30, 2019, the Ministry of Corporate Affairs has notified Ind AS 116, Leases. Ind AS 116 will replace the existing lease standard, Ind AS 17, Lease, and related interpretations. The Standards sets out the principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract i.e. the lessee and the lessor. Ind AS 116 introduces a single lessee accounting model and requires the lessee to recognize assets and liabilities for all leases with a term of more than twelve months, unless the underlying assets is of low value. Currently, operating lease expenses are charged to the Statement of Profit and Loss. The Standards also contains enhanced disclosure requirements for lessees. Ind AS 116 substantially carries forward the lessor accounting requirements in Ind AS 17.

The effective date for the adoption of Ind AS 116 is annual periods beginning on or after April 1, 2019. The standard permits two possible methods of transition:

(i) **Full retrospective approach**- Retrospectively to each prior period presented applying Ind AS 8, Accounting policies, Changes in Accounting Estimates and Errors.

(ii) **Modified retrospective approach**-Retrospectively, with the cumulative effect of initially applying the standard recognized at the date of initial application.

Under modified retrospective approach, the lessee records the lease liability as the present value of the remaining lease payments, discounted at the incremental borrowing rate and the right of use assets either as:

(i) Its carrying amount as if the standard had been applied since the commencement date, but discounted at the lessee's incremental borrowing rate at the date of initial application, or

(ii) An amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments related to that lease recognized under Ind AS 17 immediately before the date of initial

Certain practical expedients are available under both the methods.

On completion of evaluation of the effect of adoption of Ind AS 116, the Company is proposing to use the 'Modified Retrospective Approach' for transitioning to Ind AS 116, and take the cumulative adjustment to retained earnings, on the date of initial application (April 1, 2019). Accordingly, comparatives for the year ended March 31, 2019 will not be retrospectively adjusted. The Company has elected certain available practical expedients on transaction.

b) Ind AS 12, Appendix C, Uncertainty over Income Tax Treatments:

On March 30, 2019, the Ministry of Corporate Affairs has notified Ind AS 12, Appendix C, Uncertainty over Income Tax Treatments which is to be applied while performing the determination of taxable profit (or loss), tax based, unused tax losses, unused tax credits and tax rates, when there is uncertainty over income tax treatments under Ind AS 12. According to the appendix, companies need to determine the probability of the relevant tax authority accepting each tax treatment, or group of tax treatments, that the companies have used or plan to use in their income tax filing which has to be considered to compute the most likely amount or the expected value of the tax treatment when determining taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates.

The standalone permits two possible methods of transaction:

(i) **Full retrospective approach**- Under this approach, Appendix C will be applied retrospectively to each prior reporting presented in accordance with Ind AS 8, Accounting policies, changes in Accounting Estimates and Errors, without using hindsight, and

(ii) Retrospectively with cumulative effect of initially applying Appendix C recognized by adjusting equity on initial application, without adjusting comparatives.

The effective date for adoption of Ind AS 12 Appendix C is annual periods beginning on or after April 1, 2019 and has decided to adjust the cumulative effect in equity on the date of initial application i.e. April 1, 2019 without adjusting comparatives.

The effect on adoption of Ind AS 12 Appendix C would be insignificant in the standalone financial statements.

c) Amendment to Ind AS 12, Income taxes:

On March 30, 2019, the Ministry of Corporate Affairs issued amendments to the guidance in Ind AS 12, Income Taxes in Connection with accounting for dividend distribution taxes.

The amendment clarifies that an entity shall recognize the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognized those past transaction or events.

Effective date for application of this amendment is annual period beginning on or after April 1, 2019. The Company is currently evaluating the effect of this amendment on the standalone financial statements.

d) Amendment to Ind AS 19, plan amendment, curtailment or settlement:

On March 30, 2019, the Ministry of Corporate Affairs issued amendments to Ind AS 19, Employee Benefits, in connection with accounting for plan amendments, curtailment or settlement.

The amendments require an entity:

(i) To use updated assumptions to determine current service cost and net interest for the remainder of the period after a plan amendments, curtailment or settlement; and

(ii) To recognize in profit or loss as part of past service cost, or a gain or loss on settlement, any reduction in a surplus even if that surplus was not previously recognized because of the impact of the

Effective date for application of this amendment is annual period beginning on or after April 1, 2019. The Company does not have any impact on account of this amendment.

BKM INDUSTRIES LIMITED
(formerly known as Manaksia Industries Limited)
(CIN-L27100WB2011PLC161235)

Notes to the Separate Financial Statements

NOTE - 4: CRITICAL ESTIMATES AND JUDGEMENTS

a) Use of Estimates :

The preparation of the financial statements in conformity with Ind AS requires management to make estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the period. Application of accounting policies that require critical accounting estimates involving complex and subjective judgments and the use of assumptions in these financial statements have been disclosed below. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial

b) Critical Accounting Estimates :

i) Property, Plant and Equipment

Property, plant and equipment represent a significant proportion of the asset base of the Company. The charge in respect of periodic depreciation is derived after determining an estimate of an asset's expected useful life and the expected residual value at the end of its life. The useful lives and residual values of company's assets are determined by management at the time the asset is acquired and reviewed periodically, including at each financial year end. The lives are based on historical experience with similar assets as well as anticipation of future events, which may impact their life, such as changes in technology.

ii) Income Taxes :

The Company's major tax jurisdictions is India. Significant judgements are involved in determining the provision for income taxes, including amount expected to be paid/recovered for uncertain tax positions.

iii) Defined benefit obligation

The cost of the defined benefit plans and the present value of the defined benefit obligation are based on actuarial valuation using the projected unit credit method. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

iv) Impairment of trade receivables

The company estimates the collectability of accounts receivables by analysing historical payment patterns, customer concentrations, customer credit worthiness and current economic trends. If the financial condition of customer deteriorates, additional allowances may be required.

v) Impairment of Assets

The carrying amount of assets are reviewed at each balance sheet date to determine if there is any indication of impairment based on external/ internal factors. An impairment loss is recognised wherever the carrying amount of an asset exceeds its recoverable amount which represents the greater of the net selling price and value in use of the assets. The estimated cash flows considered for determining the value in use, are discounted to the present value at weighted average cost of capital (WACC).

NOTE - 35: DISCLOSURE UNDER IND AS 19 "EMPLOYEE BENEFITS"

Defined Benefit Plan:

The employees' gratuity fund scheme (unfunded) is a defined benefit plan. The Present Value of obligations is determined based on actuarial valuation using the Projected Unit Cost Method.

(i) Post Employment Obligations

a) Gratuity

Gratuity is paid to employees under the Payment of Gratuity Act 1972 through unfunded scheme. The present value of obligation is determined based on actuarial valuation using projected unit credit method, which recognizes each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation.

(ii) Defined contribution plans

The company also has certain defined contribution plans. Contributions are made to provident fund in India for employees at the rate of 12% of basic salary and dearness allowances as per regulations. The contributions are made to registered provident fund administered by the government. The obligation of the company is limited to the amount contributed and it has no further contractual nor any constructive obligation. The company also contribute to Employee State Insurance (ESI) at the rate of 4.75% of basic salary as per the regulations. The ESI funds is maintained by appropriate authority of State Government.

The amounts recognised in the balance sheet and movements in the net defined benefits obligation over the year are as follows:

Particulars	31st March 2019	31st March 2018
1) Change in Defined Benefit Obligation :		
Defined Benefit Obligation at the beginning of the year	358	336
Interest Cost	27	25
Current Service Cost	21	25
Benefits Paid	(6)	(12)
Actuarial Gain / (Loss) on Obligation	(48)	(16)
Present Value of obligation as at the end of the year	353	358
2) Change in Fair Value of the Asset		
Fair Value of the plan assets at the beginning of the year	-	-
Investment Income	-	-
Contributions	-	-
Benefits paid	-	-
Return on plan assets, excluding amount recognised in Net Interest Expenses	-	-
Fair Value of Plan assets at the end of the year	-	-
3) Net Asset/(Liability) recognised in the Balance Sheet		
Fair Value of the Plan Assets	-	-
Present Value of the obligation as at the end of the year	353	358
Amount recognized in Balance Sheet	(353)	(358)
4) Expenses recognised in the Income Statement (under the head contribution to provident fund and other funds)		
Current Service Cost	21	25
Net Interest Income/(cost) on the Net Defined Benefit liability	27	25
Expenses recognised in the statement of Profit and Loss	49	50
5) Other Comprehensive Income		
Expected Return from Plan Asset	-	-
Net Actuarial Gain/(Loss) recognized in the year	(48)	(16)
Components of defined benefit costs recognised in Other Comprehensive income	(48)	(16)

The key assumptions used in the calculations are as follows :-

Particulars	31st March 2019	31st March 2018
Discount Rate	7.30% p.a.	7.60% p.a.
Rate of increase in salaries	5.00% p.a.	5.00% p.a.
Mortality	IALM 06-08 Ultimate	IALM 06-08 Ultimate
Attrition Rate	2.00% p.a.	2.00% p.a.

Sensitivity Analysis

Particulars	As on 31st March 2019		As on 31st March 2018	
	Decrease	Increase	Decrease	Increase
Discount Rate (-/+ 1%)	380	328	389	331
% change compared to base due to sensitivity	7.85%	-6.93%	8.59%	-7.56%
Salary Growth (-/+1%)	327	381	330	390
% change compared to base due to sensitivity	-7.33%	8.18%	-8.00%	8.97%
Attrition Rate (-/+50%)	348	356	353	363
% change compared to base due to sensitivity	-1.19%	1.08%	-1.52%	1.38%
Mortality Rate (-/+10%)	352	353	357	359
% change compared to base due to sensitivity	-0.24%	0.23%	-0.33%	0.33%

Description of Risk Exposures

Valuations are performed on certain basic set of pre-determined assumptions and other regulatory framework which may vary overtime. Thus, the Company is exposed to various risks in providing the above gratuity benefit which are as follows:

a. Interest Rate risk :

The plan exposes the Company to the risk of fall in interest rates. A fall in interest rates will result in an increase in the ultimate cost of providing the above benefit and will thus result in an increase in the value of the liability (as shown in financial statements).

b. Liquidity Risk :

This is the risk that the Company is not able to meet the short-term gratuity pay-outs. This may arise due to non-availability of enough cash / cash equivalent to meet the liabilities or holding of illiquid assets not being sold in time.

c. Salary Escalation Risk :

The present value of the defined benefit plans calculated with the assumption of salary increase rate of plan participants in future. Deviation in the rate of increase of salary in future for plan participants from the rate of increase in salary used to determine the present value of obligation will have a bearing on the plan's liability.

d. Demographic Risk :

The Company has used certain mortality and attrition assumptions in valuation of the liability. The Company is exposed to the risk of actual experience turning out to be worse compared to the assumption.

e. Regulatory Risk :

Gratuity benefit is paid in accordance with the requirements of the Payment of Gratuity Act , 1972 (as amended from time to time). There is a risk of change in regulations requiring higher gratuity pay-outs.

Notes to the Separate Financial Statements

Note - 36: FAIR VALUE MEASUREMENTS

(Rupees in INR Lakhs)

Total financial liabilities	-	-	13,111	-	-	9,292

(ii) Fair value hierarchy:

This section explains the judgements and estimates made in determining the fair values of the financial instruments that are,
(a) recognised and measured at fair value, and
(b) measured at amortised cost and for which fair values are disclosed in the financial statements.

To provide an indication about the reliability of the inputs used in determining fair value, the company has classified its financial instruments into three levels prescribed under the Ind AS 113 "Fair Value Measurements". An explanation of each level follows underneath the table.

Financial assets and liabilities measured at fair value - recurring fair value measurements At March 31, 2019	Level 1	Level 2	Level 3	Total
Financial assets				
Financial investments at FVPL				
Equity instruments	-	-	-	-
Mutual funds	-	-	-	-
Financial investments at FVOCI				
Quoted equity investments	-	-	-	-
Unquoted equity investments	-	-	-	-
Derivatives				
Foreign exchange forward contracts	-	-	-	-
Foreign currency options	-	-	-	-
Interest rate swaps	-	-	-	-
Total	-	-	-	-

Financial assets and liabilities measured at fair value - recurring fair value measurements At March 31, 2018	Level 1	Level 2	Level 3	Total
Financial assets				
Financial investments at FVPL				
Equity instruments	-	-	-	-
Mutual funds	-	-	-	-
Financial investments at FVOCI				
Quoted equity investments	-	-	-	-
Unquoted equity investments	-	-	-	-
Derivatives				
Foreign exchange forward contracts	-	-	-	-
Foreign currency options	-	-	-	-
Interest rate swaps	-	-	-	-
Total	-	-	-	-

Level 1 : This hierarchy includes financial instruments measured using quoted prices. This includes listed equity instruments and mutual funds that have quoted price. The fair value of all equity instruments (including bonds) which are traded in the stock exchange is valued using the closing price as at the reporting period. The mutual funds are valued using the closing NAV.

Level 2 : Fair value of financial instruments that are not traded in an active market (for example, traded bonds, over the counter derivatives) is determined using valuation techniques which maximize the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument as observable, the instrument is included in level 2.

Level 3 : If one or more of the significant inputs is not based on observable data, the instrument is included in level 3. This is the case for unlisted equity securities, contingent consideration and indemnification assets.

(iii) **As per Ind AS 107 "Financial Instrument: Disclosure"**, fair value disclosures are not required when the carrying amounts reasonably approximate the fair value. Accordingly fair value disclosures have not been made for the following financial instruments:

- (a) Trade receivables
- (b) Cash and cash equivalents
- (c) Loans
- (d) Borrowings
- (e) Trade payables
- (f) Capital Creditors
- (g) Other payables

Note - 37: FINANCIAL RISK MANAGEMENT

The company's some portion of activities are exposed to variety of financial risks i.e. credit risk and liquidity risk. The company's primary focus is to foresee the unpredictability of financial markets and seek to minimize potential adverse effects on its financial performance. The company's financial instruments (excluding receivables from related parties) are influenced mainly by the individual characteristics of each customer. The company's exposure to credit risk is concentration of risk from the top few customers and the demographics of the customers.

This note explains the sources of risk which the entity is exposed to and how the entity manages the risk and the impact of hedge accounting in the financial statements.

Risk	Exposure arising from	Measurement	Management
Credit risk	Cash and cash equivalents, trade receivables and other financial instruments, financial assets measured at amortised cost.	Ageing analysis	Diversification of bank deposits, credit limits and letters of credit.
Liquidity risk	Borrowing and other liabilities.	Credit rating, Rolling cash flow forecasts.	Availability of committed credit lines and borrowing facilities.

(A) Credit risk

Credit risk refers to the risk of default on its obligation by the counterparty resulting in a financial loss. The maximum exposure to the credit risk at the reporting date is primarily trade receivables from customers other than government entities. These Trade receivables are typically unsecured and are derived from revenue earned from domestic and foreign customers. Credit risk is managed through credit approvals, establishing credit limits and continuously monitoring the creditworthiness of customers to which the company grants credit terms in the normal course of business. On account of adoption of Ind AS 109, the company uses expected credit loss model to assess impairment loss or gain. The company uses a matrix to compute the expected credit loss allowance for trade receivable.

(i) Credit risk management

Credit risk is managed on each instrument basis. For Banks and financial institutions, only high rated banks /institutions are accepted. For other financial instruments, the company assess and maintain an internal credit rating system. The finance function consists of a separate team who assess and maintain internal credit rating system. Internal credit rating is performed on a company level basis for each class of financial instrument with different characteristics.

(ii) Provision for expected credit losses

Expected credit loss for trade receivables under simplified approach

Particulars	31st March 2019	31st March 2018
Gross Carrying amount	7,347	5,678
Expected loss rate	8%	11%
Expected credit losses (Loss allowance provision)	-624	-624
Carrying amount of trade receivables (net of impairment)	6,723	5,054

Significant estimates and judgements

Impairment of financial assets

The impairment provisions for financial assets disclosed above are based on assumptions about risk of default and expected loss rates. The company uses judgement in making these assumptions and selecting the inputs to the impairment calculator, based on the company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

(B) Liquidity Risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions. Due to the dynamic nature of the underlying businesses, the company treasury maintains flexibility in funding by maintaining availability under committed credit lines. Management monitors rolling forecasts of the company's liquidity position (comprising the undrawn borrowing facilities below) and cash and cash equivalents on the basis of expected cash flows. This is generally carried out at local level in accordance with practice and limits set by the company. These limits vary by locations to take into account the liquidity of the market in which the entity operates. In addition, the company's liquidity management policy involves projecting cash flows in major currencies and considering the level of liquid assets necessary to meet these, monitoring balance sheet liquidity ratios against internal and external regulatory requirements and maintaining debt financing plans.

(i) Sensitivity- Interest rate risk exposure

Profit or loss sensitive to higher/ lower of interest expense from borrowings as a result of changes in interest rates:

Particulars	31st March 2019	31st March 2018
Interest rates- increase by 50 basis points (50bps)	-0.24%	-2.25%
Interest rates- decrease by 50 basis points (50bps)	0.24%	2.25%
* Holding all other variables constant.		

(ii) Cash flow and fair value interest rate risk

The company's main interest rate risk arises from long term borrowings with variable rates, which expose the group to cash flow interest rate risk. Group policy is to maintain most of its borrowings at fixed rate using interest rate swaps to achieve this when necessary. During 31 March 2019 and 31 March 2018, the company's borrowings at variable rate were mainly denominated in INR. The company's fixed rate borrowings are carried at amortised cost. They are therefore not subject to interest rate risk as defined in Ind AS 107, since neither the carrying amount nor the future cash flows will fluctuate because of a change in market interest rates.

(iii) **Price risk**

The company's exposure to equity securities price risk arises from investments held by the group and classified in the balance sheet either as fair value through OCI or at fair value through profit or loss.

To manage its price risk arising from investments equity securities, the group diversifies its portfolio. Diversification of the portfolio is done in accordance with the limits set by the group

Profit for the period would increase/ decrease as a result of gains/losses on equity securities classified as at fair value through profit or loss. Other components of equity would increase/decrease as a result of gains/losses on equity securities classified as fair value through other comprehensive income.

Note - 38: CAPITAL MANAGEMENT

(a) Risk management

The company's objectives when managing capital are to:

-safeguard their ability to continue as a going concern, so that they can continue to provide returns for shareholders and benefits for other stakeholders, and

-maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the company may adjust the amount of dividends paid to shareholders, return on capital to shareholders or issue new shares. The company monitors capital using gearing ratio, which is net debt divided by total Equity. Net debt comprises of long term and short term borrowings less cash and bank balances. Equity includes equity share capital and reserves that are managed as capital. The gearing at the end of reporting period was as follows:

Particulars	31st March 2019	31st March 2018
Net Debt	2,487	3,666
Total Equity	6,888	12,498
Net debt to Equity Ratio	0.36	0.29

(b) Dividends

Particulars	31st March 2019	31st March 2018
(i) Equity shares:		
Final dividend for the year ended 31.03.2019 of Rs. NIL	-	131
(31.03.2018 of Rs. 0.20) per fully paid share.		
Interim dividend for the year ended 31.03.2019 of Rs.	-	-
NIL (31.03.2018 of Rs. NIL) per fully paid share.		
(ii) Dividends not recognised at the end of the reporting period:		
In addition to the above dividends, since year end the directors have recommended the payment of final dividend of Rs. NIL per fully paid equity share (31.03.2018 of Rs. NIL). This proposed dividend is subject to the approval of shareholders in the ensuing annual general meeting.	-	-

BKM INDUSTRIES LIMITED
(formerly known as Manaksia Industries Limited)
(CIN-L27100WB2011PLC161235)

Notes to the Separate Financial Statements

(Rupees in INR' Lakhs)

NOTE - 39: EARNINGS PER SHARE (EPS)

Particulars	31st March 2019	31st March 2018
i) Net Profit after tax as per statement of Profit & Loss attributable to Equity Shareholders	(5,642)	527
ii) Weighted Average number of equity shares used as denominator for calculating EPS (Nos.)	65,534,050	65,534,050
iii) Face Value per Equity Share (Rs. in INR)	1.00	1.00
iv) Basic and Diluted Earnings per share (Rs. in INR)	(8.61)	0.80

NOTE - 40: FOREIGN EXCHANGE

Earnings in foreign exchange	31st March 2019	31st March 2018
i) FOB Value of Exports (including freight realised)	142	622
ii) Interest income from subsidiary company	5	19
iii) Dividend income	-	-
Total	147	641

Expenditure in foreign currency	31st March 2019	31st March 2018
i) Interest and finance charges	-	10
ii) Other Expenses	41	38
Total	41	48

CIF value of imports	31st March 2019	31st March 2018
i) Capital Goods	-	-
ii) Raw materials and other purchases	524	1,940
Total	524	1,940

NOTE - 41: CONTINGENT LIABILITY

Particulars	31st March 2019	31st March 2018
i) Guarantees given by Company's Bankers on behalf of the Company:		
a) Guarantees issued in favour of electricity department and other agencies.	34	34
ii) Claims against the Company not acknowledged as debts:		
a) Service Tax	34	34
b) Excise Duty demand under appeal	1,047	1,047

d) Others	2	2
iii) Corporate Guarantees given by Company.	-	-
Total	1,188	1,188

a. However as per management perception, the above liabilities will not devolve upon the company in future.

b. The nine-member bench of Hon'ble Supreme Court vide Order dated 11-11-2016 passed in the case of Jindal Stainless Limited & Others v. State of Haryana & Others [Civil Appeal No. 3453 OF 2002] held the 'concept of Discriminatory Taxes' as the parameter for determining as to whether the levy of Entry Tax is violate of Article 301 of Constitution of India. In terms with the opinion taken by us from Legal Counsel, the levy of Entry Tax in the State of West Bengal is DICRIMINATORY in nature and therefore the levy may not uphold in the court of law. Hence, the provision made by the Company for Entry Tax has been reversed and liability of Entry Tax has been shown in the contingent liability.

NOTE - 42: CAPITAL COMMITMENTS

Particulars	31st March 2019	31st March 2018
i) Estimated value of contracts in capital account remaining to be executed.	-	-

NOTE - 43: DISCLOSURES AS PER IND AS 108 "OPERATING SEGEMENTS"

Based on the policy set out under Significant Accounting Policy, the company follows "Management Approach" for the purpose of deciding operating segments. The operating results of each major geographical areas are regularly reviewed by the entity's chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance. Accordingly, the company has decided to consider major geographical areas as its operating segments.

(i) Operating Segment Revenues:

Operating Segments	31st March 2019	31st March 2018
United Arab Emirates (UAE)	-	684
Bangladesh	28	53
Liberia	23	11
Burma	23	119
Malaysia	7	30
Nigeria	61	16
Singapore	-	13
India	3,781	14,412
Total	3,923	15,338

(ii) Operating Segment Assets:

The operating facilities of the company are commonly employed for domestic business; hence it is not possible to report segment assets and capital expenditure by geographical segment.

(iii) Operating Segment Results:

The operating facilities of the company are commonly employed for domestic business; hence it is not possible to report segment expenditure by geographical segment. Consequently, even if the discrete segment revenues are reported, segment results are not disclosed.

Note - 44: ADDITIONAL DISCLOSURES AS PER IND AS 108 "OPERATING SEGEMENTS"**(i) Revenue From Customers Exceeding 10% of Total revenue:**

As per Para 34 of Ind AS 108, if revenues from transactions with a single external customer amount to 10 per cent or more of an entity's revenues, the company is required to disclose that fact, the total amount of revenues from each such customer, and the identity of the segment or segments reporting the revenues. The details of such disclosure is as below:

Future minimum lease payable		
Not Later than 1 year	104	104
Later than 1 year and not later than 5 years	418	418
Later than 5 year	1,036	1,141
Total	1,558	1,663

NOTE - 49: RECOGNITION OF CORPORATE GUARANTEE AS FINANCIAL LIABILITY

Financial guarantee are contractual right of the lender to receive cash from the guarantor, and a corresponding contractual obligation of the guarantor to pay the lender, if the borrower defaults. The contractual right and obligation exist because of a past transaction or event (assumption of the guarantee), even though the lender's ability to exercise its right and the requirement for the guarantor to perform under its obligation are both contingent on a future act of default by the borrower. A contingent right and obligation meet the definition of a financial asset and a financial liability, even though such assets and liabilities are not always recognised in the financial statements. Based on the measurement principles laid down under Ind AS 109 "Financial Instrument: Recognition and Measurement", the fair value of all those financial guarantee contracts reasonable below to the materiality threshold limit set by the company. Accordingly the entity has made appropriate disclosure in Note 41 without additionally recognising any financial assets or liability.

NOTE - 50: MICRO, SMALL AND MEDIUM (MSME) DUES DISCLOSURE

Disclosure of payables to MSME vendors as defined under the "Micro, Small and Medium Enterprise Development Act, 2006" is based on the information available with the company regarding the status of registration of such vendors under the said Act, as per the information received from them on requests made by the company.

There are no Micro, Small and Medium Enterprises (MSME) to whom the Company owes dues which are outstanding for a period of more than 45 days as at the balance sheet date. The above information and that given under current liabilities regarding Micro, Small and Medium Enterprises has been determined to the extent such parties have been identified on the basis of information available with the Company.

NOTE - 51: ESTIMATED USEFUL LIVES OF PROPERTY, PLANT & EQUIPMENT (PPE)
